

CERTIFICATE

FOR GEOTHERMAL DISTRIBUTION CHAMBERS AND GEOTHERMAL MANIFOLDS

This is to certify that geothermal distribution chambers and geothermal manifolds of the HIRO brand are manufactured in accordance with the requirements of the following standards and guidelines:

- SIA 384/6
- DVS 2207-1
- VDI 4640
- ÖWAV-Regelblatt 207

In particular, it is ensured that:

- materials compliant with the relevant standards are used,
- welded joints are carried out in a professional and technically proper manner, and
- leak tightness testing is performed and documented.
